

Here's your new Project-Based Learning (PBL) activity focused on creativity, design, and structural thinking. The goal is to design and build a shoe made of index cards that you will create the next Air Jordan Shoe or copy and make your favorite Jordan Shoe. This includes both a rough draft drawing with labels and an actual 3D model made with index cards. The size of the model will be explained in class.

Project Title: "Design-a-Kick!" – Shoe Creation Challenge

Objective:

Students will use critical thinking, creativity, and problem-solving skills to design and build a functional shoe using only index cards and a few basic supplies. They will begin with a rough draft drawn to plan their creation.

Materials Needed:

Index cards (at least 50 per student/group)

Tape (masking or clear)

Scissors

Markers or colored pencils

Ruler (optional)

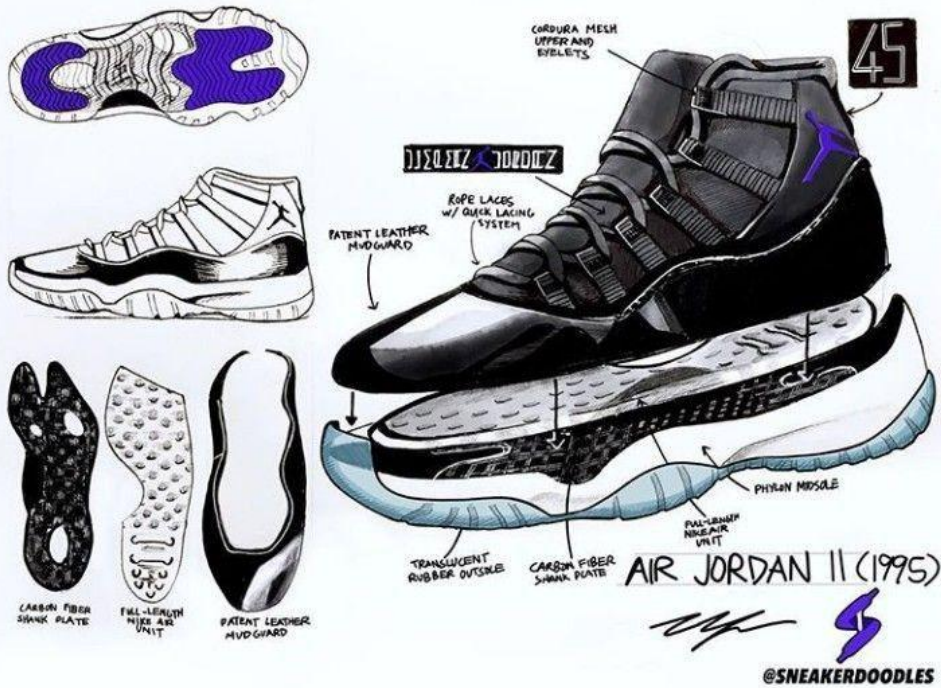

Pencil and eraser

One sheet of blank paper for rough draft

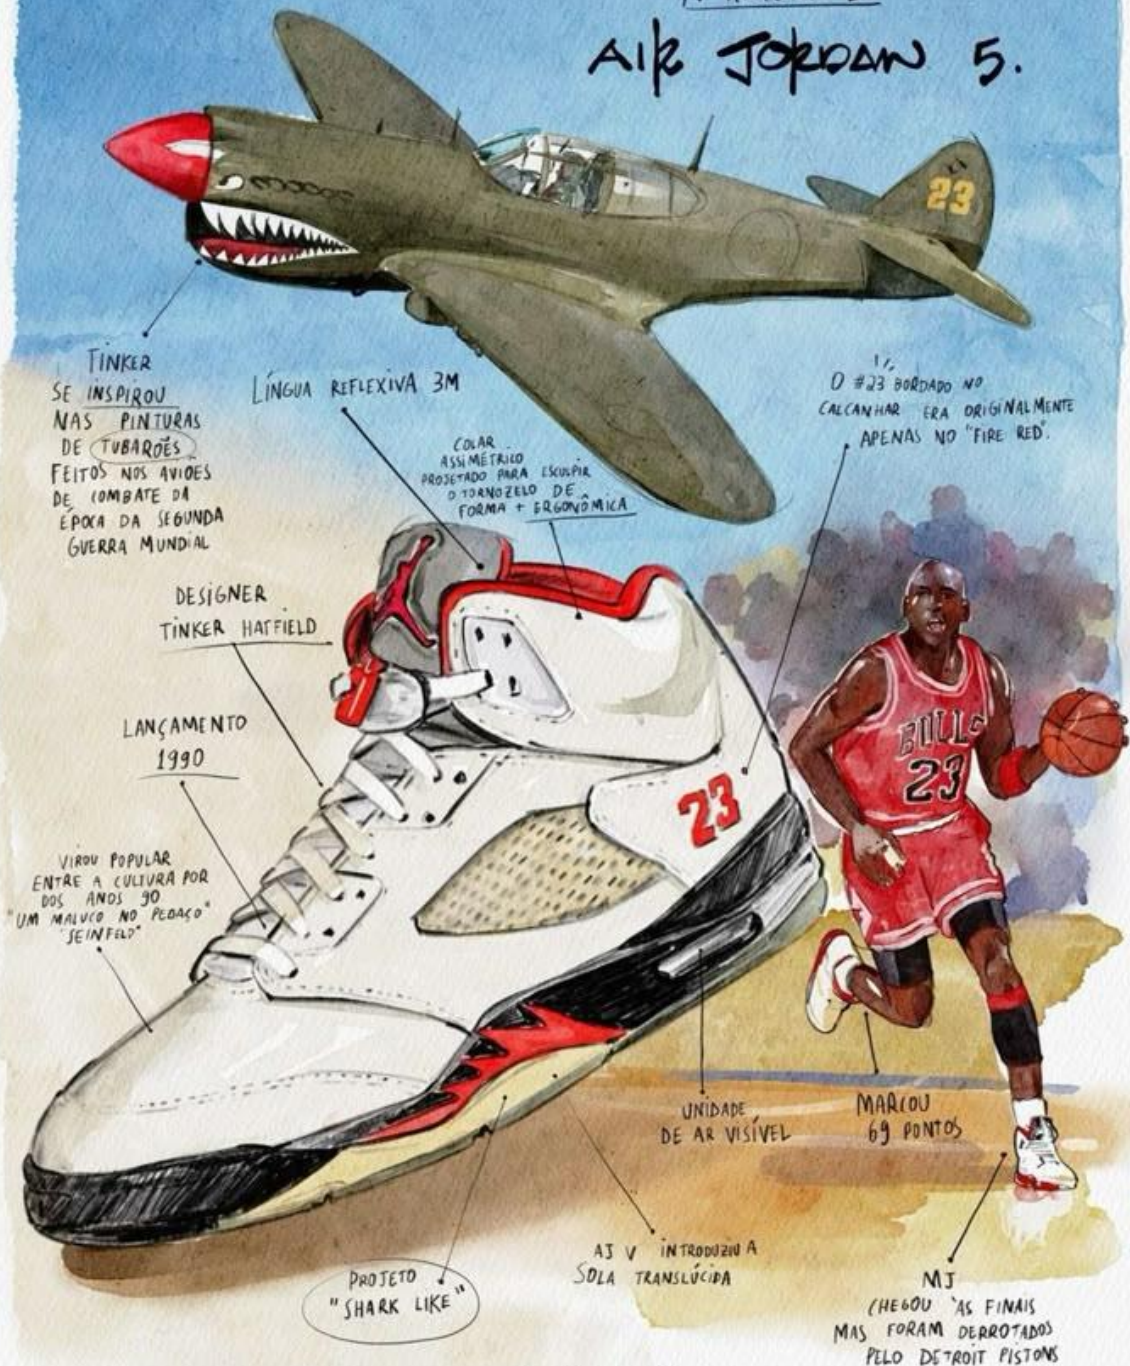

sneakerdoodles
